

# The Bacula Systems Enterprise Edition Upgrade Package

- **Need to set-up a reliable, enterprise-ready backup solution – quickly?**
- **Do you need a fast, low cost way of upgrading to Bacula Enterprise Edition?**
- **Do you need it installed, optimized and checked by our engineers?**
- **Do you need to upgrade from Bacula 2.4 to Enterprise Edition?**

## Upgrade to Bacula Enterprise Edition now

### What is it?

The Enterprise Edition low cost service offering is designed to significantly reduce the time, complexity and cost of getting Bacula Enterprise Edition fully installed with ongoing professional support coverage via our Subscription services.

Bacula Systems leading experts closely guide you through the preparation and installation process. A fully upgraded and optimized Bacula Enterprise backup solution in three working days. No hassle. No fuss.

### What do you get?

A configured Bacula Enterprise Edition to the optimum profile, taking into account your specific IT environment, installed and tuned Bacula Director, and implementation of a set of graphical management and monitoring tools - to help you manage the system from then on.

### Why does it make sense?

**Enterprise-Class Performance** - if you need an enterprise-level backup and restore solution that can be fully supported at up to ten times less cost than proprietary solutions, then the Enterprise Upgrade Package is perfect for you.

**Speed** - in just 3 days, you have a fully functional enterprise-grade backup solution installed and operational.

**Cost** – say goodbye to high license fees and maintenance costs with budget-friendly Bacula Open Source software. To get a feel for this, try the “Bacula challenge”, and calculate your backup system costs with a ZERO license fee, and see what others like Bank Austria already know (see our web site for that story)

**Risk** – Bacula Systems’ experts know backup, and bring their experience to your organisation directly, providing you a fixed-term and fixed deliverable, all wrapped up in a price-advantage special launch package.

### How long does it take?

3 working days - to get a fully functional Bacula installation for most typical network environments. Yes, there are some conditions and preparation is required.

### Where do I start?

Call Bacula Systems today to schedule an appointment or find out more about whether the Enterprise Upgrade and Subscription Package is right for you.

### Deliverables:

- Bacula Enterprise Edition Backup and Restore Platform
- Unlimited CPU's
- Bacula Administration Tool (BAT)
- Consulting with Bacula Systems leading experts
- Install and configure Bacula Enterprise Edition Platform
- Install and configure BAT
