BWeb Management Suite

The easiest way to get your Bacula Enterprise Edition up and running and to manage it and to maintain it

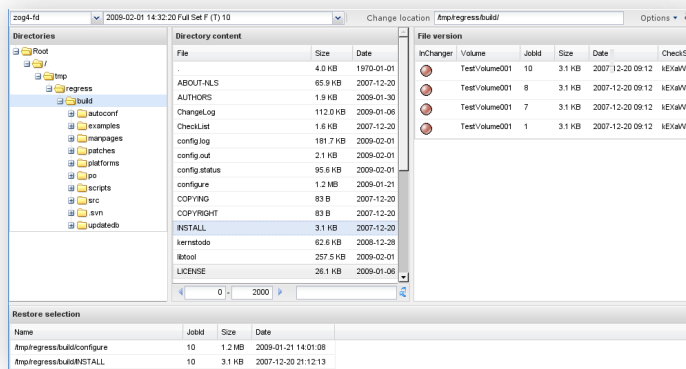

Ease of use is the main benefit that BWeb Management Suite brings to the Administrator and Operation teams.

- BWeb Management Suite allows checking the running jobs and enables the creation of new jobs!
- BWeb Management Suite provides diagnostic tools enabling the Administrator to check that the database is well configured and the BWeb Management Suite is installed properly.

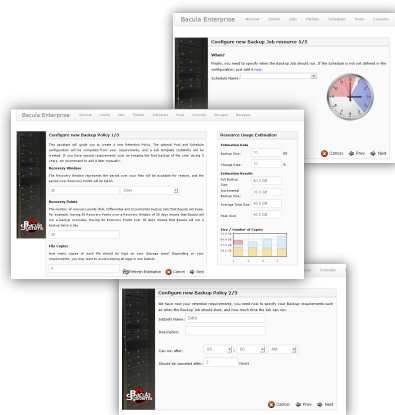

Report, analyze and manage

In addition, the Administrator will now benefit from an online help mode that will display automatic text suggestions when searching data types.

BWeb Management Suite restore interface

BWeb Management Suite offers a variety of Wizards which support the Administrator when he needs to create new jobs, providing a chronological set of required actions that guide the Administrator to perform the creation in no time!

New configuration tool
